General
Challenge: The challenge is to build a structurally efficient model water tower that holds water that can be filled and drained quickly, while also being aesthetically pleasing.

- The 2nd Annual Charlotte Model Water Tower Competition will be held as follows:
  - When: **Saturday, November 7th** from 9:00 a.m. to 12:00 p.m. In each division (elementary and middle school), the first place team will be awarded a cash prize of $300, Second Place team: $200, and Third Place team: $100.
  - Time: Check-in between **9:00 am and 9:30 am**.
  - Where: Franklin Water Treatment Plant, 5200 Brookshire Blvd. (Hwy 16), Charlotte, NC 28216.
  - Who: Elementary (4th and 5th grades) and Middle School Students (individuals or teams of up to 4).
  - Registration deadline: **TBD**. To register, please email or call Leslie Jones (contact information below) with the team name, students’ names and contact email and phone number for each team entering the competition.

- There is no cost to enter. To participate, register by TBD and arrive at the check-in on November 7th with the following materials (one set of forms for each team):
  - Bring your completed **Model Water Tower**.
  - Bring your completed **Registration**, a blank form is attached.
  - Bring your completed **Participant Release Forms (one for each student)**, a blank form is attached.
  - Bring your completed **Materials List**, a blank form is attached.
2nd Annual Charlotte
Model Water Tower Competition

- Model water towers may be of any design and constructed from any materials. In fact, you will be awarded for using creative designs and innovative materials. Creative designs mean the water tower will function even though it does not look like any other tower. Innovate materials may have been used for something else at one time – an old broom handle used for support, for instance. Due to facility constraints, we cannot supply electricity to towers.

**Objective**

The objective of the competition is to make participants aware of the importance of reliable drinking water and the rewarding opportunities available in the water profession. The competition does this by having students develop an idea into a functioning water tower, just like water professionals do in the real world!

**Prizes** will be awarded to the top three finishers, with a top prize of $300 for 1st place. The lowest scores win. Judges’ decision is final.

Judging will be based on four criteria – structural efficiency, hydraulic efficiency, cost efficiency and design ingenuity. Understand and achieve these criteria to do well! They are explained below.

**Structural Efficiency**

Structural efficiency is calculated by dividing the weight of the model when it is empty by the average height of the tank times the amount of water it holds. The lower this number the better. This is shown with the following formula:

\[ \text{Structural Efficiency} = \frac{\text{Weight of the tower when empty (pounds)}}{\text{Average tank height (ft) \times Amount of water the model holds (gal)}} \]

This criterion is similar to what engineer’s use in the real world!

Remember, the tank should be between 1.5 feet and 2.5 feet high.

**Hydraulic Efficiency**

Hydraulic efficiency is the amount of time it takes the judges to fill the model with 1 gallon of water and drain it back out again. The judges will fill the tank through the 3/8 inch connector. The less time it takes to fill and drain the tank through the connector the better.
2nd Annual Charlotte

Model Water Tower Competition

Cost Efficiency

Cost efficiency measures your ability to save money while building your model. Bring receipts for all items purchased for your model. Points will be assigned as follows (the lower the score the better):

- $ 0.00 - $ 5.00  1 pt
- $ 5.01 - $ 10.00  2 pt
- $ 10.01 - $ 15.00  3 pt
- $ 15.01 - $ 20.00  4 pt
- More than $ 20.00  5 pt

List all items used in your model and their costs on the Materials List Form. Where recycled items are used, put the letter “R” in the cost column. You may use as many recycled materials as you wish. A penalty of 1 pt will be given for each missing receipt for items purchased new. No receipt is necessary for recycled items.

Design Ingenuity

Ingenuity (in · ge · nu · i · ty) is how much imagination and skill were used in your model. Water professional must often use ingenuity; they use skill and imagination to solve difficult problems. The judges will look at several items:

- Craftsmanship (is the model sturdy, do the parts fit together nicely)?
- Imagination (are the design or materials unique)?
- Artistic merit (does the model have creative ideas, colors or themes)?

Model Water Tower Competition

**Penalties**

Keep to the following standards when designing and constructing your model:

- The base of the model must fit in a square **1 foot on each side**.
- The tank must be **between 1.5 and 2.5 feet high**.
- The tank must have a **vent or removable lid** so the judges can tell when it is full.
- When full, the tank must **hold between 1 and 2.5 gallons** of water and it **should not leak**. Hint: test your model to make sure.
- The model must use the **3/8 inch connector** specified.
- **Bring receipts** for all materials purchased for your model. A one point penalty will be given for each item not having a receipt. (Reminder: recycled items have no cost associated with them and do not require a receipt.)
- **Electricity will not be supplied to your tower.**

**Penalties will be assessed for not following the above standards.** These standards are demonstrated in the diagram attached at the end of this hand-out.

**Additional Information**

For more information please contact the event organizer as follows:

Participant Release Form

INSTRUCTIONS: Each team member must bring a copy of this form signed by their parent or guardian.

I AM THE PARENT/GUARDIAN OF ____________________________________________

I HEREBY AUTHORIZE THE MEMBERS OF THE WATER TOWER COMPETITION COMMITTEE, A SPECIAL PROJECT OF THE AMERICAN WATERWORKS ASSOCIATION-WATER FOR PEOPLE COMMITTEE TO:

1. PREPARE ANY PROMOTIONAL MATERIAL SUCH AS PRESENTATIONS, SLIDE SHOWS, VIDEO TAPES, PHOTOGRAPHS AND MOVIE FILMS IN WHICH MY CHILD WILL SPEAK AND/OR APPEAR.

2. USE, REUSE, PUBLISH AND REPUBLISH THE SAME IN THE WHOLE OR IN PART INDIVIDUALLY OR IN CONJUNCTION WITH OTHER PHOTOGRAPHS, VIDEO OR FILM IN ANY MEDIUM FOR ANY PURPOSES WHOSOEVER, INCLUDING (BUT NOT BY WAY OF LIMITATION) ILLUSTRATION, PROMOTION AND ADVERTISING BY THE COMMITTEE.

I HEREBY WAIVE ANY MONETARY RIGHTS OR OTHER RIGHTS THAT I MAY HAVE TO INSPECT AND/OR TO APPROVE THE FINISHED PRODUCT OR THE ADVERTISING COPY THAT MAY BE USED IN CONNECTION THERewith OR THE USE TO WHICH IT MAY BE APPLIED. I UNDERSTAND AND AGREE THAT ALL RIGHTS, ROYALTIES AND MATERIALS WILL BELONG TO THE COMMITTEE.

TOTAL $ 

*Use additional sheets if necessary to list all materials. A penalty will be given for not bringing this form and required receipts.
The proper 3/8” diameter push-on connector must be used by all registered contestants. Connectors must be 3/8” O.D. on the pump connection side. Watts 3/8” OD by 3/8” OD quick connect union elbows (Model No. PL-3022) are available at both Lowes and Home Depot for approximately $3.50. The cost of the connector will be deducted from the total cost to construct so it will not affect your “Cost Efficiency” score. You must use the connector specified to avoid a penalty. Contact Leslie Jones (information provided below) if you need additional information about the connector:
