

# CMS Middle School Alliance

October 9, 2010

Room 010 (Ground Floor) College of Education Building  
Park in the Union Parking Deck. [Campus Map](#)

Focus: Earth Science Systems

Come and learn with your fellow middle school science teachers about earth science systems through discussion and activities. The activities will cover earth science grades 6 -8 matching the NC standard course of study.

Dr. Andy Bobyarchick, UNC Charlotte Geography and Earth Science, will be the guest presenter.

Do you know how mountains are formed?

What is the tallest mountain in the world?

What is the significance of mountains on communities?

What is the oldest mountain range in the world?

Following Dr. Bobyarchick's presentation there will be an activity session that will allow you to see and participate in earth systems activities.

Please RSVP –we have materials to order. Email Nancy Addison to reserve your spot: [nancyh.addison@cms.k12.nc.us](mailto:nancyh.addison@cms.k12.nc.us).
